coins.

Digital Currency

- ▶ Conversion in the future from Fiat currency into a gold backed basel III and IV compliant coin.
- ▶ The coins themselves and the virtual coins will have barcodes (ownership) and GPS tracking devices (location).

- ▶The **CIPS** Virtual Currency will look, on the surface, much like Bitcoin, but it will be secured by real assets and it will replace all current currencies, worldwide.
- ▶Transactions will run on the QFS VPN and can be used for the purchase of all goods and services. Utilizing the resources of the **CIPS**.
- ▶100 billion coins in Platinum, Diamonds, and Gold.
- ▶Once minted, there will never be more, or fewer coins in existence.
- ▶Each **CIPS** coin will have a virtual counterpart.
- ▶The QFS AI will keep track of fluctuation and will manage all bounding conditions (as well as keep track of all locations).

**Cross-Border Interbank
Payment System (CIPS)**

- ❑ Central Banks of 193 host nations electronic funds will be used for digital currency and exchanges for host country planned developments.
- ❑ Gold Backed Digital Currency and Coin Tokens.
- ❑ FSC bank paper issued in the form of Gold Backed Short Term Bonds and ITRs.
- ❑ Physical Cash injection from private offerings of BEB Coins on the Global Financial Markets.

Cross-Border Interbank Payment System (CIPS)

Quantum Financial System
(QFS)

Cross-Border Interbank Payment System (CIPS)

- ▶ Register for a **CIPS** Wallet
- ▶ Be the first to get access to our next-generation Gold Backed Digital Currency Technology.

Register now

- ▶ The next generation driven mobile banking with 3D Facial Recognition Security. **CIPS (Cross-Border Interbank Payment System)** mission is to bridge the gap between digital gold backed currency and fiat currencies by providing a decentralized online and mobile banking solution that is easy to use, accessible and nondiscriminatory inclusive of all demographics.
- ▶ Unlike many blockchain services, **CIPS** is enabling the mass adoption of Gold Backed Digital Currencies as they would fiat currencies worldwide. We achieve this by providing seamless exchange between crypto and fiat, by providing quick enrollment, safe, compliant on boarding and easy-to-use features on our banking platform with the same traditional banking services people are used to.

EXCHANGE

- ▶ **CIPS**, to be launched in Q4 2021, will offer the next-generation trading solution for Gold Back Digital Currencies and **CIPS Tokens**. The exchange will support all Digital Gold Backed Currencies. The exchange will offer high liquidity, a transparent order book, and low fees, Furthermore, to provide a utility for our **CIPS Tokens**, the trading of all pairs including our **Tokens** will be free! This way it will be a more cost efficient way to buy **CIPS Tokens**.

Any 2D movie/video/photo converted into 3D instantly

- ▶ Support with latest 3D new materials as well as new process to output the best and most comfortable, sharp and clear, with the greatest clarity glasses-free 3D images.
- ▶ Online/offline 3D platform with numerous 3D content, 3D movie, video, game, VR, photos, entertainment programs for endless fun and joy!

CROSS-BORDER PLATFORM

- ▶ **CIPS**'s digital and transparent services are not only attractive for the banked population, but they can also deliver financial inclusion solutions to the 2.5 billion unbanked and 1 billion underbanked globally, thereby creating a unique cross-border platform to serve everyone, everywhere.

LIGHTNING SPEED

- ▶ When you want to send, spend, or receive money, nobody likes to wait. High performance Quantum Financial System (QFS) and Gold Backed Digital Technology.
- ▶ When you want to send, spend, or receive money, nobody likes to wait! High performance Q Cloud Intelligent Networks Technology is necessary to provide a viable alternative to existing binary financial platforms. Therefore, we have secured a partnership with the fastest Photonic Network in the world.
- ▶ QFS is designed from the ground up to process 10 Trillion transactions every second. Trillions of times faster than all the other binary financial solutions combined.
- ▶ *“He who controls the fastest network controls the world’s money supply.”*
 - Chief Scientist, Quantum Financial System (QFS)

Quantum Financial System (QFS)

- ▶ **Quantum Financial System (QFS)**
- ▶ Servers: Optical computers and servers perform computations and instruction sets by using photons rather than electrons. A 'pure' optical computer works pretty much like its electron counterpart except the input is light, the computations are light, and the output is light. Optical computers use light-stream pulses rather than voltage. There is no conversion from binary to optical which means fantastic speeds.

QFS 3D Smart Q Phone

- ▶ **QFS 3D Smart Phone:** The device works like a cell phone but will be capable of non-cellular reception such as UHF and VHF broadcasts as well as acting as a node on a light-stream network. As a light-stream client, it will be capable of receiving data and information many times faster than cellular or internet protocols. This increase in speed, coupled with other technologies including the AI and the Library, will make it's 'virtual assistant' super-fast and super smart. The Q Phone will connect to **CIPS** transactions in its light-stream mode which will utilize 'Picture Streaming Protocol'. One important goal for this device will be to replace ATMs and paper currency. It will also, given its ability to receive UHF and VHF be a de facto television. It is intended, through its **connectivity to our cloud servers to serve as the interface to and replacement of television, computers, games, and internet-of-things control.**

- ❖ Savings and investments are serious and important endeavours and with the rise of FSC-BEB online bank as a legitimate alternative for those not interested in investing in fiat currencies, have a Bullion Exchange Bank savings account which is a viable option for investors seeking full online transparency.

We are in the process of building a digital asset index fund, that will use your capital to buy the top 25 performing crypto assets in the market.

No broker fees, no exit fees, no minimum investment and full control over your money with full transparency. You can cash out anytime you want, for free. We only charge a 2% fee of your profits, this way we only make money if you do.

We only make money – together!

Why just save - when you can invest?

Cross-Border Interbank Payment System (CIPS)

▶ TOKEN

▶ CIPS Token

- ▶ We created CIPS Token to have a fast and secure currency for transactions anywhere, at anytime!
- ▶ **From slow to lightning speed...**
- ▶ CIPS system will reside on a custom private Digital Monetary System network built by Quantum Financial System (QFS). Upon completion current tokens will be ported over the QFS.

Wallet

An all-in-one secure FSC-BEB online wallet to manage and exchange gold backed assets.

Our online Wallet provides a secure platform to exchange and manage all of your digital Gold-Backed Assets.

Currently, we support our own FSC-BEB Token. When we launch our platform, we plan to support the following: Bitcoin, Bitcoin Cash, Dash, Ethereum Classic, Litecoin, and ERC20 compatible tokens.

The screenshot displays a digital wallet interface. At the top center is a white diamond-shaped logo. Below it, the balance is shown as 19.97961538 ETH, with a corresponding value of \$8,311.52 USD. Two buttons, 'SEND' and 'RECEIVE', are positioned below the balance. A navigation bar contains four tabs: 'ALL', 'SENT', 'RECEIVED', and 'EXCHANGED'. The 'RECEIVED' tab is selected. The transaction history table below shows five entries:

Icon	Type	Amount	Value	Status	Time
✈️	Sent	1,234,567,890 ETC	(\$1,23)	Unconfirmed	1 Minute Ago
↔️	Exchanged	1,234,567,890 ETC	(\$1,23)		2 Hours Ago

Advanced Security Level

We take security seriously

Two Factor Authentication

Biometrics

We designed our Digital Gold Backed wallets with security in mind. All data encrypted with QFS GPS authentication between sender and receiver. Impossible to hack.

We added an additional layer of security. Q 3D Smartphone Facial and Voice Recognition. Ensuring the safety of your account and wallet

We are not only relying on 2FA-Two Factor Authentication, but mixing it up with fingerprint Biometrics

- ▶ Purchase QFS **Tokens**
- ▶ You can purchase QFS **Tokens** and participate in the future development of our Digital Gold Backed Currency System.
- ▶ In the future, our Tokens will be used as the internal currency of **CIPS**, and serve as our utility **Token**.

Exchange »

All trading pairs from and to **Tokens** will be without fee. If you wish to trade pairs that doesn't include **Tokens**, you can choose to deduct the exchange trading fee from you balance – and get a 50% discount on the trading fee

Cross-Border Interbank Payment System (CIPS)

▶ About Us

▶ Leading by Example

- ▶ We have always believed that QFS technology has the potential to impact the world economy. We want to empower people to exchange value globally, instantly and at low cost. With this vision in mind, we are hard at work bringing you a completely new digital gold backed currency banking experience!

Exchange Highlights

- ▶ High Performance
- ▶ Advance Security
- ▶ Advanced Liquidity Options
- ▶ Custom White Label
- ▶ Real-time Data
- ▶ Multi Lingual

► High Performance

► **CIPS** consists of a robust set of highly secured modules.

Modular design and careful design process resulted in breakthrough throughput of trillions of transactions per seconds.

► The core of the Exchange is so highly optimized, its performance surpasses very busy stock exchanges like NYSE and NASDAQ.

► Recent tests have been conducted to flood the exchange with simulated 10,000 concurrent users, results show that our exchange can easily handle more than a trillion loads with zero trade leakage.

Horizontal Unlimited Scaling

Besides being very fast **CIPS** is also highly scalable.

The planned 56 Data Center units in the USA and territories and the planned 192 Data Center units planned abroad will increase the overall power, speed and efficiency of our QFS in a parallel processing environment. The ultimate QFS Cloud System.

Advanced Features Highlights

Advanced Security

- ▶ Add a factor SMS Authentication
- ▶ SMS
- ▶ Google Authenticator
- ▶ All data encrypted with GPS, 3D facial, voice, and fingerprint biometric.
- ▶ Match & detect rogue trading behavior
- ▶ Prevent predatory dark trading

Anti-Market Manipulation

- ▶ Machine Learning
- ▶ Real-time market surveillance
- ▶ Compliance system monitors
- ▶ Detect
 - ❖ Abnormally large trades
 - ❖ Pass-through trades
 - ❖ Wash trades
 - ❖ Spoofing
 - ❖ Layering
 - ❖ Stuffing
 - ❖ Hammering
 - ❖ Momentum ignition

Advanced Liquidity Options

- ▶ Multiple liquidity options
- ▶ Distributed Shared Orderbook
- ▶ Connect to other exchanges
- ▶ Artificial trading accounts
- ▶ Automated market maker

Wallets and more

- ▶ **CIPS** Wallets supports multiple cryptos including Bitcoin, Litecoin, Ethereum, plus hundreds of existing coins and custom ERC20 tokens
- ▶ Admins can create hundreds of pairs via the admin control panel, such as BTC/USD, BTC/JPY, BTC/ETH, XRP/BTC and more
- ▶ Multi currency wallets can be developed or added via our robust Wallet API. We can even provide multi signature cold offline storage options if needed.

Real time Data

- ❖ **CIPS** provides a real time data feed for all applications attached to it.
- ❖ This means your clients will receive live data directly to the desktops, web and mobile client all at once.

White Label Solutions

CIPS Certified developers are on standby to provide you with a complete solution that fits all your requirements including but not limited to:

- ▶ Artificial Intelligence
- ▶ Risk Management
- ▶ Regulatory compliance
- ▶ AML/KYC integrations
- ▶ Hot & Cold wallets
- ▶ Accounting
- ▶ Custom Reporting
- ▶ Payment or CRM integrations & much more...

Onboarding

- ▶ **CIPS** provides all the tools needed to get to know your client before you accept them as a customer.
- ▶ All of the application data including IDs, supporting documents are fully verified. We offer a full suite of identity, documents, address and ID verifications.
- ▶ The service includes Anti-Money Laundering service which monitors real time risk through real time machine learning.

Artificial Intelligence

- ▶ The AI will be applied across the QFS (one instantiation in each data center) but the nodes will coordinate through parallel processing. The AI will work with the **CIPS** VPN in the background by providing semantic analysis and natural language processing to understand what's being said about banking products across the entire user base. It will facilitate adaptation and will evolve over time by recognizing new behavior and recommending appropriate bank-side responses.

Working Together

WE'RE LOOKING FORWARD TO WORKING TOGETHER. PLEASE LET US KNOW IF YOU HAVE ANY QUESTIONS.

Harness the power of Gold Backed Digital Currency Technology with your new card!

Midnight Black (limited edition)
Purchase & Hold
(6 months)

\$500,000

- ▶ 2.5% Cashback on all purchases (paid in crypto)
- ▶ Rare-supply limited to 999 cards
- ▶ All basic features
- ▶ No monthly or annual fees
- ▶ Free shipping
- ▶ \$30,000 Free ATM withdrawal limit (per month, 2% thereafter)

Platinum Purchase & Hold (6 months) \$100,000

- ▶ 1.5% Cashback on all purchases (paid in crypto)
- ▶ All basic features
- ▶ No Monthly or annual fees
- ▶ Free Shipping
- ▶ \$30,000 Free ATM withdrawal limit (per month, 2% thereafter)

Pre-registration for the card of your choice coming soon!

- ▶ COMING SOON!
- ▶ 1. Sign up Here
- ▶ 2. Buy the amount that is required
- ▶ 3. We will lock your tokens and ship your card.
- ▶ 4. After six (6) months, you will receive your tokens unlocked, to sell, store, or spend.
- ▶ Our Digital Gold Backed Currency System is currently under development. You may soon purchase your tokens and hold them in your wallet up to 6 months very soon.
- ▶ Cards provided by partner banks.

Traveling

Pay your bills

Shop anywhere

Make traveling simple With **CIPS** Spend your fiat or virtual currencies – Anytime, Anywhere. Withdraw cash, pay with your contactless visa card, or simply use your mobile phone to pay

From utility bills to your Spotify Premium, you will be able to easily set up automatic payments for service subscriptions that you regularly use.

You can use your **CIPS** Card for online shopping and at any brick and mortar retailer that accepts Visa® cards

Real-time notifications

Receive real-time notifications when the card is used. Detailed information for all transaction activity. Lock or unlock your card whenever you wish to.

Lost your card?

Not a problem. You can disable it anytime, anywhere directly from your phone, or by contacting customer support.

Wallet

- ▶ All-in-one secure online wallet to manage and exchange blockchain wallets.
- ▶ The **Gold** Backed Digital Currency wallet is a secure and convenient way to manage your digital assets.
- ▶ It will be the perfect companion for your digital life.
- ▶ You may soon be able have the ability to buy and sell Cloud tokens inside the Wallet.
